

Script: Testing Bitcoin Riddles

Version 7.2

Yuhao Zhang

March 14, 2019

```
#lang bs      package: bs
```

Script or (Bitcoin Script) is a language used by Bitcoin's scripting system. It is a stack based language read from left to right.

Some opcodes needs meta data from transactions in order to operate, like `OP_CHECKSIG` and `OP_MULTICHECKSIG`, etc. These opcodes are not supported by current version of [bs](#).
